

IDEATION & PROTOTYPING WORKSHOP

CERTIFICATE

of participation at the Ideation & Prototyping
workshop at RCA from the 19th August to 29th
August 2024

Ange Nadette Batete

has worked together with 240 other participants on their own prototype
within the eight-day Ideation & Prototyping workshop at Rwanda Coding
Academy.

The participants independently brainstormed which problems they wanted
to work on and formed teams in which they

- diligently analyzed their problem statements,
- developed prototypes for their solutions using techniques including
breadboarding and wireframing,
- implemented clickable prototypes using Figma.

The participants presented their results in front of RCA students, Staff
members, and Guest of Honors on the last day of the workshop.
